

Spencer Kelly

TV Technology Presenter

"A respected broadcaster and journalist"

Spencer Kelly is a respected technology presenter and computer scientist who's been in the business for over 20 years. After a seven-year stint as a breakfast radio host, Spencer joined the BBC as a Presenter on Click and has travelled the world to seek out not only the most advanced tech but simple devices which make a huge difference.

TOPICS:

- Technology
- Future Trends
- Awards
- Conference Host

LANGUAGES:

He presents in English.

IN DETAIL:

He's fronted Panorama, presented at the BAFTAs and hosted the world's first 360 show in Virtual Reality. You might also have seen him on Celebrity Mastermind and Celebrity Eggheads, or heard him on Radio 2, 4 and 5 Live. He has tested satellite broadband in the scorching Namib desert and been turned into an alien in the studios of Industrial Light & Magic in San Francisco. And he has reported on the re-emergence of 3D movies and TV in Los Angeles. Spencer graduated with a double first in Computer Science from Cambridge University and has been awarded an Honorary Doctorate of Technology by the University of Coventry.

WHAT HE OFFERS YOU:

Spencer tells stories of tech from around the world and explains the big trends of the moment - artificial intelligence, automation and blockchain, amongst others - to help companies transform into digital businesses. He looks ahead to the exciting technologies that are just around the corner.

HOW HE PRESENTS:

Spencer's energetic and engaging hosting-style, his winning attitude and passion for new technologies capture any audience.
